

Initial Issue faced by Pakistan

When Hind got separated into two separate homelands, then India tried to put his all efforts for destroying Pakistan in many ways, so that we got merge again in India because of poor survival.

India behaved us in worst manner in everything.

Some major issue faced by Pakistan are these:

- Water resources
- Kashmir
- Boundary Distribution
- Armed resources
- Financial Assets.

We'll discuss all of these now shortly one by one in detail & concise way.

Water Resources

At the time of establishments of Pakistan, there are six rivers in Hind.

All of rivers has their origin in India. In **1948**, for the purpose of destroying Pakistani Economy and agricultural field, India stopped the waters of all Rivers, which supply water into canals of Pakistan.

It is the rule of world that if a river is passing between two countries, no one country has right to stop water for the other one.

But India violate this rule & in response, Pakistan raised this issue into UN.

And at last in **1960**, an agreement signed between two countries named as Indus, due to which 3 rivers got in belongings of Pakistan & 3 got into India's possessions.

Kashmir

Kashmir problem is the most important dispute between two countries and an Unsolved issue till yet after passage of 73 years.

If we talk in fair manners, Kashmir should be the part of Pakistan, because its population was 85% Muslims.

But India declared Kashmir its own part in clever way & started its brutality on Muslims of India.

Pakistan raised this issue many times in UN, but due to incorporation of India, this issue is still unresolved.

Boundary Distribution

For establishments of both countries, a British commission was set up under a secretary named as “**Sir Redcliff**”.

By collaboration of Lord Mountbatten, he misused his powers and handed over many Muslim majority areas to India like Pothohar, Gurdaspur, Ferozpur.

This thing caused a lot of issues to Pakistan. Because in these countries all rivers between two countries have their origins. And this thing caused water issues too.

This is totally unfair justice by British govt.

Armed resources

The general of army wanted that army should not be divided. It remains in same unity.

But Pakistan refused this and asked for divide army in both countries.

But instead of doing justice, India proved him brutal this time too.

Pakistan received nothing in assets, broken things, broken aircrafts & old things.

There are **16** ordnance factories in Hind, but Pakistan received nothing.

Pakistan got no fair soldiers according to decision, & this thing gave lot of difficulties to Pakistan.

Financial Assets

At the time of Separation, there are **4 billion** rupees of Hind.

Pakistan has share of **750 million** in this.

At start India delayed this but gave 200 million.

Now India is reluctant to give remaining amount. But at protest of Pakistan, India gave remaining amount in form of 500 Million.

Still 50 million are remaining, after passage of 73 years.

To be brief, Pakistan faced many more issues. But by grace of Allah Almighty and leadership of Quaid-e-Azam, we overcome on these issues and succeeded to form a well-established Pakistan.
